INDIVIDUAL DIGITAL CATEGORY DESCRIPTIONS:

Digital Altered Reality:

Images are not limited in the type of subject matter presented. The primary distinction for the Altered Reality category is that the maker intends (and the viewer easily recognizes) that the image is not a representation of reality. Any photographic technique can be used as long as the image begins as a photograph, and all the elements are the work of the entrant. All manipulations and enhancements are allowed and encouraged. Any type of border is allowed.

Digital Monochrome:

Monochrome is limited to monochromatic hues or shades of gray, although filters may be applied to give the image a hue or tint. No part of the image shall be given a special color treatment. Images with more than one color must NOT be entered in this category. A solid border is allowed.

Digital Nature:

Restricted to the use of the photographic process to depict observations from all branches of natural history, except anthropology and archaeology, in such a fashion that a well-informed person would be able to identify the subject material and certify its honest presentation. The storytelling value of a photograph will be weighted along with the pictorial quality. Human elements shall NOT be present except on the rare occasion where the human elements enhance the nature story. The presence of scientific banding on wildlife animals is acceptable. Photographs of artificially produced hybrid plants or animals, mounted specimens, or obviously set arrangements are not eligible, as is any form of manipulation that alters the truth of the photographic statement.

Makers may perform any enhancements and modifications that improve the presentation of the image that could have been done at the time the image was taken, but that do not change the truth of the original nature story. Cropping and horizontal flipping (equivalent to reversing a slide) are acceptable modifications. Addition of elements, removal of elements other than by cropping, combining elements from separate images, rearranging elements, or cloning elements, are not acceptable. Monochrome entries are allowed. A solid border is allowed.

Digital Realistic:

Images are not limited in the type of subject matter presented. The image should look like a straight photograph and not look manipulated or enhanced in any way, even if such work is done. You may use the image editing tools of your software. However, Painterly, Artistic, Stylized, Distorted, Pixilated, Brush Strokes, or other similar effects or filters are not appropriate in this category, and should be entered in the Altered Reality category. Monochrome entries are allowed. Solid borders are allowed. High Dynamic Range (HDR) images are acceptable as long as the result looks realistic.
